

GRA1750 Project 7 – Movie Website

This project requires the student to setup using CSS and HTML a movie website of their choice. Movie must exist or be in development. The website must meet the requirements listed below.

- Design the layout for a Movie website of your choice in Photoshop or Illustrator.
- Create a design document to assist you in staying on track with the site design.
- Using your design, recreate the webpage using HTML and CSS.
- The site must include the following:
 - /1. Website Navigation
 - /2. Movie Title
 - /3. Movie Poster
 - 4. Main Actors with short bio's, and links to their IMDB respective pages.
 - 5. Director with short bio, and a link to his IMDB page.
 - 6. Distributing company logo, linking to the company website.
 - 7. A short movie premise and/or synopsis
 - 8. Movie release date
 - /9. Movie trailer, or link to movie trailer
 - 10. Movie Gallery
 - 11. Link to movie soundtrack
 - 12. A Privacy Policy Link/section
 - 13. A Terms of Use Link/section
 - 14. A share button
 - 15. Critic's section
 - 16. IF movie is current, a link to an online ticketing service where tickets may be purchased.
- The Movie website should be completed by Monday, December 11, 2017 by the end of class. Website should be live on Github and in your domain server as a subdomain.
